Abstract—Hotel Management System is a hotel reservation site script where site users will be able to search rooms availability with an online booking reservations system. Site users can also browse hotels, view room inventory, check availability, and book reservations in real-time. Site users enter check in date and check out date then search for availability and rates. After choosing the right room in the wanted hotel – all booking and reservation process is done on the site and an SMS is sent to confirm the booking.

I. INTRODUCTION

The Main Objective of hotel organizations could be improved by integrating service-oriented operations service-oriented operations with project management principles. Such integration would instill innovation, proactive attitudes and regulated risk-taking needed to pursue ongoing improvement and proactive response to change. By managing each change as a project, embedded in smoothly running operations, hotels would extend their life span by continuously reinventing themselves. Due to which the customers can easily book the hotels rooms..

II. LITERATURE REVIEW

Hotel is a building, symbol, company or business entity that provides services accommodation, food and beverage providers and other service facilities where all the services are intended for the people, whether they are staying overnight at the hotel or those who only use the facilities. According to the experts the definition of hotel: Rumekso (2002:2) states that hotel is a building which hires the rooms with the facilities such as food and beverage which is run well to get the benefits. Sulastiyono (2007:3) says that hotel is an accommodation that gives the facilities like rooms, food and beverage and other supporting facilities such as sport area, and laundry. According to Tarmoezi and Manurung (2007:1) hotel is a building that provides the rooms with the supporting facilities such as the food and beverage. Base on the definition, hotel is not only sells the room but hotel is one of accommodation that sell the other facilities.

III. PROPOSED METHODOLOGY

Hotel reservation system plays a great role and has a potential effect on day to day performance measures, this type of system have highly evolved from decades due to high demand for their use, effective and efficiency in any given institutions.

IV. CONCLUSION AND FUTURE WORK

This is to conclude that the project that I undertook was worked upon with a sincere effort. Most of the requirements have been fulfilled up to the mark and the requirements which have been remaining, can be completed with a short extension. The project made here is just to ensure that this product could be valid in today real challenging world. Here all the facilities are made and tested. Currently the system works for limited number of administrators to work. In near future it will be extended for many types of insurance policies so that efficiency can be improved..

ACKNOWLEDGMENT

I would like to thank my honourable **Khan Md. Hasib Sir** for his time, generosity and critical insights into this project.
